\* In recognition of the public health interest in immunization products, the CPT Editorial Panel recognizes new immunization product codes with CPT codes and publishes the codes prior to FDA approval. These codes are indicated with the (⚡) symbol and will be tracked by the AMA to monitor FDA approval status. Once the FDA status changes to approval, the (⚡) symbol will be removed.

The Centers for Disease Control (CDC) will update the [CPT Codes Mapped to CVX Codes Table](#) upon FDA approval.<sup>3</sup>
